

M. HARESH KUMAR

DATA OPERATIONS MANAGER & SYSTEMS AUTOMATION CONSULTANT

Bengaluru, India | +91 9663683773 | hareshmkumar9@gmail.com | Portfolio: LeadGenData.github.io/portfolio

PROFESSIONAL SUMMARY

Data and Analytics professional with 14+ years of robust experience leading B2B data operations, high-volume reporting delivery, and business intelligence pipelines. Expert at managing cross-functional execution teams of 15+ members to consistently meet data quality benchmarks and client SLAs. Adept at transforming unstructured market data into highly accurate production assets using advanced spreadsheet modeling. Actively leverages cutting-edge agentic development platforms (Google Antigravity) to architect serverless business automation tools, bridging long-term operational leadership with modern data engineering capabilities.

CORE EXPERTISE

Operational Leadership & Data:

- SLA & Cross-Functional Team Management
- Web Verification & High-Volume Auditing
- Advanced Excel Modeling & Macro Automation
- Data Hygiene & Database Cleansing Checks

Cloud Platforms & Ingestion:

- Snowflake Medallion Streams & Tasks
- SQL Transformation & Star Schema Modeling
- Power BI KPI & DAX Dashboard Deployments
- Cloudflare Workers API Proxy & Serverless APIs

PROFESSIONAL EXPERIENCE

Data Consultant | Ariviga Technologies Pvt Ltd (Bengaluru, India)

July 2025 – Present

- Pipeline Architecture: Build and optimize data pipelines using SQL, Snowflake Streams, and Tasks for automated, incremental data processing.
- Business Intelligence: Develop comprehensive Power BI dashboards for strategic KPI tracking and business performance visibility.
- Workflow Optimization: Integrate multiple data sources and implement strong validation checks across transformation layers to maximize reporting accuracy.

Manager – Data & Delivery | Innovays Business Services

Aug 2010 – Jan 2025

- Team Leadership: Led, trained, and allocated daily tasks for a core data operation and reporting delivery team of 15+ members handling large enterprise client accounts.
- Scale Data Operations: Managed, processed, and verified large-scale datasets (200K–300K+ records monthly) utilizing deep Google web searching, manual extraction, and advanced Excel modelling.
- Process Automation: Built advanced Excel-based automation frameworks and macros, successfully reducing team manual reporting cycle times from 5 days down to 1 day.
- Quality Audits: Introduced strict data quality checking rules and regular internal audit processes to completely eliminate final output delivery errors.

INDEPENDENT PROJECTS (DEVELOPED VIA GOOGLE ANTIGRAVITY)

- Revenue Leakage Calculator: Web auditing tool routing client intakes to a secure Apps Script background engine, storing logs in central Google Sheets databases via Cloudflare Worker endpoints.
- Executive Leads CRM Dashboard: React & Vite administration panel synchronizing lead statuses, search queries, and de-duplication rules with persistent client states.
- Outlook Sent Campaign Scraper: Python and PowerShell automation sweeps reading local email boxes, performing bounce logs scraping, and updating database tables.

CERTIFICATIONS

- Transact-SQL Querying (HackerRank Feb 2025) | Preparing Data for Analysis with Excel (Coursera)
- Snowflake Academies: Data Application Development, Data Warehousing, Cost & Collaboration Workshops
